

When working with wire, it is always a good idea to dress your tools to avoid marring the wire. Here are some tips for how to best dress your tools when using our Soft Flex® Craft Wire.

- Buff tool tips with 00 steel wool, then follow up with 000 steel wool
- Dip tool tip in “Tool Magic” coating, dip just one tip to maintain a better grip
- Use a smooth tape like masking, cloth or painter’s tape to cover tool tips
- Soften your grip
